

## Infants and Toddlers Needed for a Research Study

Is your infant or toddler between 15 and 27 months of age?

If so, please join us for an infant/toddler research fair. You will be asked to volunteer for a research study which will take approximately 30 minutes.

For this study, you will be asked to:

- Sign a research consent form
- Complete a developmental questionnaire about your child
- Observe your child in a short play interaction
- Volunteer for a one to three month follow-up screening visit at either the Emory Autism Center, or the Emory-GA Tech Health Systems Institute

We are conducting this research so that we may learn how to detect autism early in life.

See below for information about our next research fair:

- Day: Thursdays and Fridays
- Time: 8am-6pm by appointment
- Location: Emory Autism Center, 1551 Shoup Court, Clairmont Campus, Emory University

Please contact Monica Allen or Samuel Fernandez-Carriba at (404)727-8350 or [Monica.Allen@emory.edu](mailto:Monica.Allen@emory.edu) or [sferna2@emory.edu](mailto:sferna2@emory.edu) for further information.

This study is being conducted in collaboration with the Emory-Georgia Tech Health Systems Institute
