Emory Autism Center

Fall 2020 ADOS-2 Introductory/Clinical Workshops - Virtual

Join us for these EAC sponsored introductory/clinical ADOS-2 workshops

The *Autism Diagnostic Observation Schedule (ADOS)* is an assessment designed to help professionals identify individuals with Autism Spectrum Disorder (ASD) as part of a comprehensive evaluation. The ADOS-2 includes 5 modules for toddlers through adults. The ADOS-2 is published by Western Psychological Services and is available for clinical use. For researchers, this workshop is a prerequisite to more intensive training offered by the ADOS-2 authors, designed to achieve the high reliability levels needed in research (for more information, see www.wpspublish.com). *Both of the ADOS-2 training workshops provide experienced autism professionals with introductory training on the use of the ADOS-2 in clinical settings across ages, developmental levels, and language skills.*

registration

https://eac_2020ados2.eventbrite.com

*To Register and receive instructions for payment

Modules 1-4: October 1-2, 2020: 9:00 AM - 4:30 PM

- Discussion

workshop presenter

Catherine E. Rice, Ph.D.

Dr. Rice is the Director of the Emory Autism Center and a Professor in the Department of Psychiatry & Behavioral Sciences at Emory University. Dr. Rice previously worked as a developmental psychologist with the National Center on Birth Defects and Developmental Disabilities at the CDC. She works on public health programs to monitor and improve early identification of young children with autism and other developmental concerns. As an ADOS trainer, Dr. Rice has trained numerous professional groups nationally and internationally in both clinical and research use of the ADOS-2.

Questions and Answers

Who Should Attend: Participants should have prior education, training, and experience that includes extensive exposure to autism spectrum disorders. The ADOS-2 Introductory/Clinical Workshop is meant for clinicians who already have knowledge of the characteristics of autism spectrum disorder, as well as with some previous experience in the assessment and diagnosis, eligibility determination, and/or treatment planning with this population. The ADOS-2 is intended to be administered, interpreted, and used by professionals aligning within their scope of practice and credentials. *Clinicians* who currently evaluate children with ASD, including physicians, psychologists, occupational therapists, speech-language pathologists, and early intervention assessment specialists. For *researchers*, this workshop is a prerequisite to a more thorough training offered by the ADOS-2 authors. **Participants must have attended an ADOS-2 Modules 1-4 Introductory/Clinical Workshop prior to attending the ADOS-2 Toddler Introductory/Clinical Workshop.*

ADOS-2 Manual: Participants must have an ADOS-2 Manual at the workshop. You can purchase the manual through Western Psychological Services (WPS) at 1-800-648-8857 or www.wpspublish.com. It is also highly recommended that you have access to an ADOS-2 kit and that you have practiced administering the different modules prior to the workshop so you are familiar with the administration. ADOS-2 kits, manual, and materials can be purchased through WPS.

Registration and Fees: Pre-registration is required and will be accepted on the Eventbrite website https://eac_2020ados2.eventbrite.com. Any registration and payment after **September 16th** will incur a \$50.00 non-refundable late registration fee. A discounted rate is available to groups sending 5 or more participants as long as all registrations are indicated as the same "Group" on the registration. *GPA CE credits pending (7/27/2020).*

Please go to https://eac_2020ados2.eventbrite.com to **complete registration and you will receive instructions for payment.**
